

Busy Bee Pediatrics Vaccination Statement and Policy

Busy Bee Pediatrics is a vaccinating practice – for the health and safety of our patients and our community.

Vaccines prevent serious illnesses and save lives.

Vaccines are safe.

Children and young adults should receive all recommended vaccines according to the schedule published by the Centers of Disease Control and supported by the American Academy of Pediatrics. The vaccine schedule is the result of decades of data, research and scientific study gathered on millions of children by our smartest scientists and doctors. Busy Bee Pediatrics recommends the standard and proven vaccine schedule of the CDC.

Choosing an alternative schedule is a reckless gamble.

“Alternative” or “delayed” vaccine schedules endanger children’s lives by leaving them less protected and susceptible to preventable diseases at a young and vulnerable age.

Busy Bee Pediatrics’ patients must receive at least a minimum number of vaccines in a timely manner to remain part of our practice. Whooping cough, Pneumococcal infection, and Measles remain a serious threat to children’s health.

We are happy to discuss vaccine importance and safety at any visit.

We recommend these online resources for more information:

www.vaccine.chop.edu

www.voicesforvaccines.org

www.immunize.org

If you ask to temporarily delay your child’s vaccines (or immunize on an “alternative” schedule) we will ask that you sign:

Vaccine refusal form: www.immunize.org/catg.d/p4059.pdf

Thank you for protecting the health and safety of our community!
